User Panel:

1. Home:

User browse most of the view pages without being logged in. But for better experiences we would suggest you to browse this application with logged in state.

- How to Sign Up or Create account?
 - On the right top of the home page there is two button. One for Logging in and the other for Signing Up. If user already has an account he/she does not need to sign up again. For registering himself / herself. For signing up users must provide First name, Last name, a unique Email id and a Password. If the provided Email id does not conflict with other user's email ids then the user will be registered successfully.
- How to Log In to this application?
 - After clicking on the Login button, users to fill out the email and password fields with the valid email and password which they used for creating the account.
- How to get a course list?
 - There are couple of types of course list. Like Category based course list, Top Courses list, Top 10 latest courses list. If a user wants to get Web Development courses, He/she can select the Web Development category from the Category menu at the top. Under the banner image there is two horizontal list for Top Courses and Top 10 latest courses.

- How to search for a course?
 - User can search for a course on Search field by course title.
- Wishlisting Courses.
 - User can add courses to their wishlist. But they will be able to do that if they remain logged in only.
- Adding to Cart.
 - User can add courses to their cart without being logged in. Logging in requires if any user wants to checkout.

2. Course Details:

- What is inside Course Details?
 - When a user clicks on a certain course link, it will take that user to the Course Details page. Which describes the every single details about that specific course. Like the Course title, Instructor details, rating and reviews, what a user will learn after finishing that course, what are the prerequisites, lessons list, total time to finish that course, a video overview and the other related courses with same category and sub category. User can add this to their carts and can directly buy it from this page.

3. Cart:

- What is inside my cart?
 - As we said before, Users do not need to be logged in to add courses to their cart. But if they want to checkout, they will

have to. On the cart page the users will see all the courses that they've added to their cart. They can remove course from the cart. The total amount will be counted course wise.

4. My Courses:

- What is inside My Courses?
 - When a user purchases any course, that course gets added to the My Courses page. Users will access this page only if they remain logged in. My Courses will have all the courses that a user has purchased. Users can rate those courses, see the course details and can start learning from this page. User can also search a specific purchased course from here. If a user remains logged in, he/she will see his/her profile image on the right top of the header. On hovering over the profile image a view gets appear which contains couple of options including My Courses.

5. Wishlists:

- What is inside Wishlists?
 - Wishlist will show all the courses that a user wishlisted. They can see an overview of that course from the wishlists. If they want to check the course details, they can just click on the title of that course. They can see the instructor details by clicking on the instructor thumbnail. User can also search specific wishlisted course from here.

6. Purchase History:

7. Start Learning:

- How can we start learning?
 - Clicking on a course from My Courses page will take the user to the Learn Lessons page. It will display all the lessons section wise. User can click on a section and it will open up and show a list of courses that the section has.

8. **Become an Instructor:**

- How to become an instructor?
 - Every valid registered user can become an Instructor. But the Admin of this application has to enable it from the backend. If Admin enables the instructor settings, a navigation menu named “**Instructor**” will be showed up on the website after a user logs in. All the menu created for an instructor will be popped up after hovering over the Instructor menu. Instructor can create a course by filling all the required field of the Create course form which will be appeared after clicking on **Create course** menu. Instructor can see all the courses he’s made on the **Dashboard**. Every time an instructor creates or updates a course, it will be created with **Pending** status. The admin will approve the course and make it Active. Instructor can add, edit or delete Sections and Lessons from editing the course. An instructor can save a course in Draft. Draft course will not be appeared on Admin panel. On the dashboard there are couple of menus like, “Active Courses”, “Pending Courses”, “Draft”, “Payment report” and “Payment Settings”. **Payment settings is mandatory for becoming an instructor**. Because after every successful course purchasing, Admin will pay a predefined portion of that payment amount to the instructor.

10. **Payment Report For Instructor:**

- What inside Payment Report for Instructor?
 - As we said before, after every successful course purchasing, Admin will pay a predefined portion of that payment amount to the instructor. Instructor will be able to see all the payment

information in Payment report menu with the current Payment status.

11. My Messages:

- What is My Messages?
 - User can send messages to the instructor. This menu appears when user hovers over the profile image.

12. User Profile:

- Update your profile.
 - User can update their profile from User profile menu. This menu appears also when user hovers over the profile image.
